噴火

The diagram shows a cross-section of a volcanic plateau. At the bottom center is a light blue circular magma chamber. Above it is a dark brown central vent. The vent is flanked by two brown, conical hills. The top surface of the hills and the surrounding area is a light orange color, representing a layer of ash or tephra. The upper part of the diagram is a light blue sky. The text '冷えて空洞ができる' is located in the sky area, and '↓火砕流台地' is on the left side of the hills.

冷えて空洞
ができる
